

# MRACLE

## *A NEW ERA IN TUMOR DETECTION*

MRacle is an **advanced** AI-powered platform that leverages deep learning to **deliver rapid, accurate brain tumor analysis**, supporting radiologists in making informed clinical decisions.

### *How It Works*

- Leverages powerful neural networks to interpret MRI scans with precision
- Pinpoints suspicious areas and marks regions of the brain that may be affected
- Presents full MRI images with user-friendly, interactive navigation
- Adds clear, AI-generated overlays to make tumor regions easy to review

### *Why Choose MRacle?*

- Automatically flags high-risk cases, helping radiologists focus where it matters most
- Speeds up the MRI review process, saving valuable time
- Serves as an intelligent second opinion, minimizing the chance of something being missed

MRacle is designed to support, **not replace**, radiologists' expertise. It streamlines the workflow while **ensuring that medical professionals make all final decisions and diagnoses**.
